4. First-aid measures

Description of first aid measures

General advice:	Move out of dangerous area. Never give anything by mouth to an unconscious person. Move to fresh air.
Inhalation:	If symptoms persist, call a physician. Take off all contaminated clothing immediately.
Skin contact:	If skin irritation persists, call a physician. Irrigate copiously with clean, fresh water for at least 10 minutes, keep eye wide open while rinsing.
In case of eye contact:	Remove contact lenses. Protect unharmed eye. If eye irritation persists, consult a specialist. Prevent vomiting if possible. If a person vomits when lying on his back, place him in the recovery position. Never give anything by mouth to an unconscious person.
Ingestion:	Clean mouth with water. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed

Symptoms:	no data available
Risks:	no data available

Indication of any immediate medical attention and special treatment needed

Treatment:	no data available

5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide
Unsuitable extinguishing:	high volume water jet

Special hazards arising from the substance or mixture

Specific hazards during fire fighting:	Do not use a solid water stream as it may scatter and spread fire
--	---

Advice for firefighters

Special protective equipment for fire-fighters:	Wear self contained breathing apparatus.

MATERIAL SAFETY DATA SHEET

In accordance with 1907/2006/EC, 1272/2008/EC

Date: December 20, 2021

Further information:

Use water spray to cool unopened containers.

In the event of fire and/or explosion do not breathe fumes

6. Accidental release measures

Personal precautions:

Avoid inhalation and contact with skin and eyes. A self-contained breathing apparatus is recommended in case of a major spill.

Environmental:

keep away from drains, surface and ground water, and soil.

Methods for cleaning up:

Clean up spillage promptly. Remove ignition sources. Provide adequate ventilation. Avoid excessive inhalation of vapours. Gross spillages should be contained by use of sand or inert powder and disposed of according to the local regulations.

7. Handling and storage

Advice on safe handling : Avoid excessive inhalation of concentrated vapors. Follow good manufacturing practices for housekeeping and personal hygiene. Wash any exposed skin immediately after any chemical contact, before breaks and meals, and at the end of each work period. Contaminated clothing and shoes should be thoroughly cleaned before re-use.

If appropriate, procedures used during the handling of this material should also be used when cleaning equipment or removing residual chemicals from tanks or other containers, especially when steam or hot water is used, as this may increase vapor concentrations in the workplace air. Where chemicals are openly handled, access should be restricted to properly trained employees.

Keep all heated processes at the lowest necessary temperature in order to minimize emissions of volatile chemicals into the air.

Advice on protection against fire and explosion : Keep away from ignition sources and naked flame.

Requirements for storage areas and containers: Store in a cool, dry and ventilated area. Keep away from sources of ignition and naked flames.

Specific use: No information available

8. Exposure controls/personal protection

Components no substances with occupational exposure limit values.

Respiratory protection: Use local exhaust ventilation around open tanks and other open sources of potential exposures in order to avoid excessive inhalation, including places where this material is openly weighed or measured. In addition, use general dilution ventilation of the work area to eliminate or reduce possible worker exposures. No respiratory protection is required during normal operations in a workplace where engineering controls such as adequate ventilation, etc. are sufficient.

If engineering controls and safe work practices are not sufficient, an approved, properly fitted respirator with organic vapor cartridges or canisters and particulate filters should be used:

a) while engineering controls and appropriate safe work practices and/or procedures are being

b) during short term maintenance procedures when engineering controls are not in normal operation or

- c)if normal operational workplace vapor concentration in the air is increased due to heat ;
 d)during emergencies; or
 e)if engineering controls and operational practices are not sufficient to reduce airborne concentrations below an established occupational exposure limit.

Hygiene measures: To the extent deemed appropriate, implement pre-placement and regularly scheduled ascertainment of symptoms and spirometry testing of lung function for workers who are regularly exposed to this material.

To the extent deemed appropriate, use an experienced air sampling expert to identify and measure volatile chemicals that could be present in the workplace air to determine potential exposures and to ensure the continuing effectiveness of engineering controls and operational practices to minimize exposure.

Skin protection: Not needed for normal use.

Hand protection: Avoid skin contact , Use chemically resistant gloves as needed.

9.Physical and chemical properties

Appearance	: liquid
Odor	: conforms to standard
Color	: colorless to light yellow
Refractive Index,n	: 1.4419±0.010
SpecificGravity, d	: 0.9050±0.010

Lower explosion limit	: not determined
Upper explosion limit	: not determined
Flammability	: not determined
Flash point	: 87°C
Oxidizing properties	: not determined
Boiling point	: not determined

10.Stability and reactivity

Conditions to avoid: Direct sources of heat.

Materials to avoid: Avoid contact with strong acids, alkali or oxidizing agents.

Substances to avoid: None in particular.

Hazardous decomposition pr Carbon monoxide and unidentified organic compounds may be formed during combustion.

11.Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Acute Toxicity (Oral LD50) Not determined.

Acute Toxicity (Dermal LD50) Not determined.

Acute Toxicity (Oral LD52) Not determined.

Skin Corrosion/ Irritation	Not determined.
Respiratory or skin sensitization	Not determined.
Germ Cell mutagenicity	Not determined.
Carcinogenicity	Not determined.
Reproductive Toxicity	Not determined.
Specific target organ toxicity - single exposure	Not determined.
Specific target organ toxicity - repeated exposure	Not determined.

Aspiration hazard:

Viscosity	Not determined
Inhalation	May cause sensitization by inhalation.
Ingestion	May cause stomach pain or vomiting
Skin contact	May cause an allergic skin reaction.
Eye contact	May cause severe irritation to eyes.

12. Ecological information

No ecological studies have been carried out on this product.

12.7 Additional ecological information:

General notes:

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage

13. Disposal considerations

Dispose of according to local regulations.

Avoid disposing into drainage systems and into the environment.

Empty containers should be taken to an approved waste handling site for recycling or disposal.
