## Section 4 - First Aid Measures

### 4.1 Description of first aid measures

**Eye Contact:** Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. If irritation persists, seek medical attention.

**Skin Contact:** Wash off with soap and plenty of water.

**Inhalation:** Remove to fresh air and keep at rest in a position comfortable for breathing. Dust in throat and nasal passages should clear spontaneously. Contact a physician if discomfort.

**Ingestion:** DO NOT induce vomiting. Wash out mouth with water and give plenty of water to drink (at least 300 ml.). Consult a physician attention and get medical attention immediately.

### 4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labeling (see section 2.2) and/or in section 11.

### 4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically and supportively.

## Section 5 -Extinguishing media

### 5.1 Extinguishing media

**Suitable extinguishing media:** Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

### 5.2 Special hazards arising from the substance or mixture

Decomposition products formed under fire conditions. - Hydrogen chloride gas, calcium oxide.

### 5.3 Advice for firefighters

Evacuate personnel to safe areas. As in any fire, Wear self-contained breathing apparatus and full protective gear for firefighting.

### 5.4 Further information

Avoid contaminated firefighting water releasing to drains or waterways.

## Section 6 - Accidental Release Measures

For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. See Chapter 13 for information on disposal. Observe the relevant local and international regulations.

### 6.1 Personal precautions, protective equipment and emergency procedures:

Evacuate area. Ventilate area. Avoid dust generation. Avoid inhaling dust. Use suitable personal protective equipment.

### 6.2 Environmental precautions:

Prevent uncontrolled discharges into the environment (rivers, water courses, sewers etc.).

See exposure scenarios covering intended use in the environment like de-icing and dust suppression.

### 6.3 Methods and materials for containment and cleaning up:

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers. Preferably for re-use, otherwise for disposal. Wash the spillage area with large quantities of water. For disposal see section 13.

## Section 7 - Handling and Storage

### 7.1 Precautions for safe handling:

Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.

Provide appropriate exhaust ventilation at places where dust is formed. Wear suitable personal protective equipment in section 8. Avoid formation of dust and aerosols. Avoid inhaling dust. Avoid contact with skin and eyes. Wash thoroughly after handling.

### 7.2 Conditions for safe storage, including any incompatibilities:

**Safe storage conditions:** Store in cool place. Keep container tightly closed in a dry and well-ventilated place. Avoid excessive ventilation as the product can absorb moisture from the air. Calcium chloride liquors can cause pitting of and corrosion of some grades of stainless steel and under high temperature and stress conditions can promote stress corrosion cracking. Store away from foodstuffs.

**Incompatible materials:** Do not store together with strong oxidizing agent, strong reducing agent, acid.

## Section 8 - Exposure Controls, Personal Protection

**8.1 Exposure Limits:** Not established.

### 8.2 Exposure controls

**Engineering Control:** General industrial hygiene practice. Provide appropriate exhaust ventilation at places where dust is formed.

#### Personal protective equipment:

**Respiratory Protection:** Where protection from nuisance levels of dusts are desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

**Eyes Protection:** Use face shield and safety glasses if in-eye risk exists. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

**Body Protection:** Use normal work suit is enough.

**Hands Protection:** Wear suitable protective gloves to avoid skin exposure. Suitable materials include neoprene (chloroprene), PVC and nitrile rubber.

**Other Protections:** Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.
